ISO 9001
certified by

Modular Demountable Isolation Booth and Anteroom

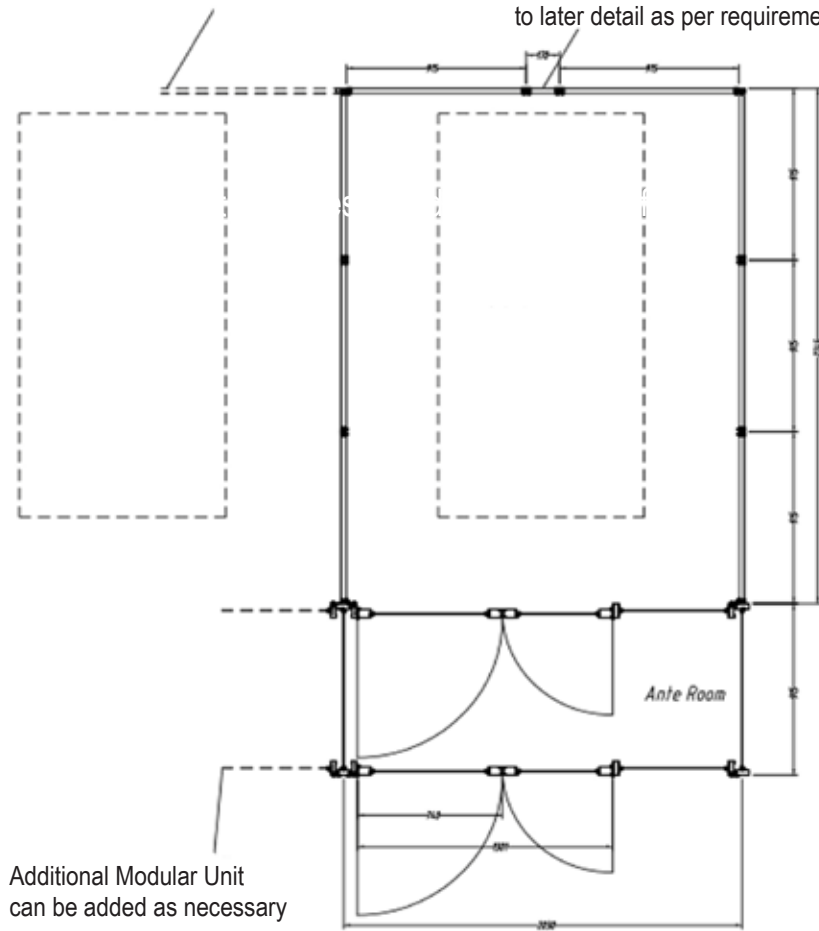

*Ideal for Temporary Negative Pressure Isolation when combined
with appropriate HEPA Filter or Mobile Ventilation Units.*

Plan View

Additional Modular Unit can be added as necessary

Solid Panel to be machined to interface with Medical Gasses, electrical, ventilation etc to later detail as per requirements

Additional Modular Unit can be added as necessary

Specifications:

Freestanding structure, sealed to floor with double sided tape. Modular panels fixed and sealed to one another to become self-supporting. Panels are modular, to be screwed together to allow for easy disassembly and re-deployment elsewhere.

Ante-Room & Side Structure:

Powder Coated or Anodised Aluminium Frames with 6.38mm clear Laminated Safety Glass

Modular Panels & Roof:

Powdercoated or Anodised Aluminium Frames with 500 micron clear UV Stabalised PVC (can be glass on request)

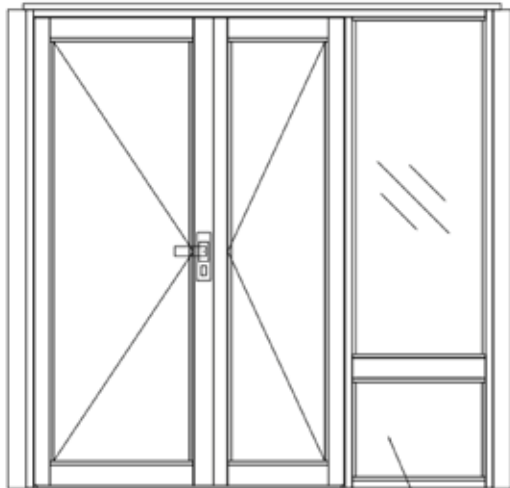

Overall dimensions:

3660mm long x 2000mm high x 2030mm wide

These sizes have been optimised to minimise material offcuts.

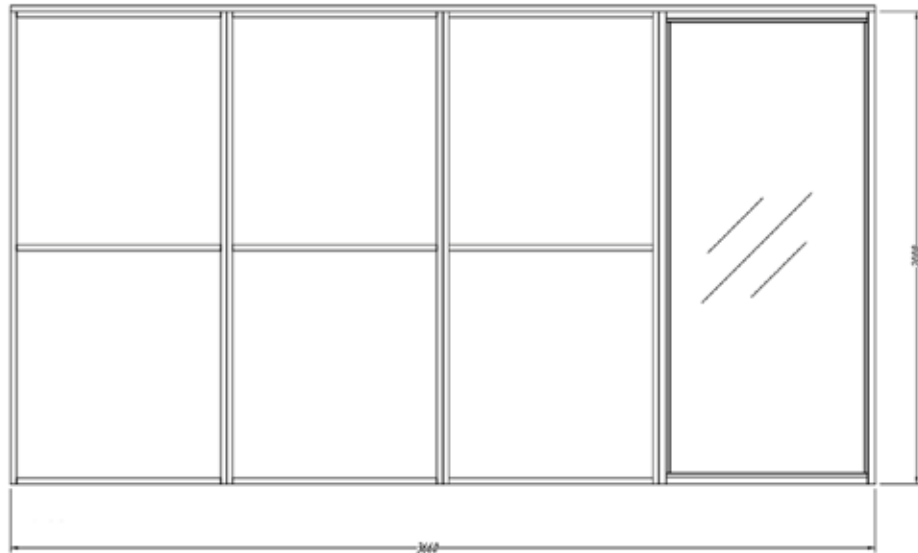

Aluglass Bautech can adapt the sizes and design to suit your requirements.
